Technical Experience

Front End: React, Redux, Apollo, JavaScript (ES6), Bootstrap, jQuery, CSS, HTML

Back End: Node, Express, GraphQL, Mongoose, MongoDB

Developer Tools: Git/GitHub, Heroku CI/CD, Travis CI, Jest

Recent Software Engineering Applications

Obento (*in progress*) | ReactJS, Redux, Apollo, GraphQL, Node, Express, Mongoose, MongoDB, ReactDnD, Heroku CI/CD

Plan your weekly meals and share your meal plans. | [Site](#)

- Enabled recipes to be drag and dropped into days to store recipe data in each day with ReactDnD
- Created GraphQL queries to fetch and add recipes to mLab Mongo database.
- Setup continuous integration and deployment for easier collaboration between software engineers.

ProjectGallery | ReactJS, Redux, Jest, Enzyme, JavaScript, CSS

View projects I've worked on. | [Site](#) | [GitHub](#)

- Added filter functionality to allow users to filter projects by name and technology.
- Modified React components to become stateless functional with Redux.

Recent Professional Experience

Teaching Assistant | Trilogy Education

2019 - Present

- Assist instructor in teaching adult students full stack development, focusing on technologies such as HTML, CSS, Git/GitHub, JavaScript, jQuery, React, Node, Express, and MongoDB.

Teacher | Sylvan

2015 - Present

- Teach JavaScript among other courses, and inspiring students to learn coding by showing off a [Simon](#) game app I built (using Dojo) and "hacking" websites through Chrome Dev Tools, attracting more clients.

Web Development Intern | ActiveLAMP

2017

- ActiveLAMP | HTML, CSS, Jekyll
 - Implemented pagination to "Musings", allowing users to view all results of specific category.
 - Enhanced mobile view for pages of website, refining locations of images, buttons, and text.
- All American Fence Erectors | HTML, CSS, Drupal 8
 - Fixed functionality of slideshows, allowing correct picture to show upon click.
 - Adjusted slideshow layout for mobile view, preventing button overlap.
- Make-A-Deal | HTML, CSS, JavaScript, AngularJS
 - Remedied user input of purchased products with validation, taking into account entries of less than 1.
 - Removed duplicate data, rendering based on salesperson rather than product sold.

Education

Hack Reactor, Advanced Software Engineering Remote Immersive

2018

Udacity, Front-End Web Developer Nanodegree

2016

California State Polytechnic, Pomona, B.S in Computer Engineering

2009

Organizations

Inland Empire Software Developers | [Meetup Site](#) | Co-Organizer, Speaker | Riverside, CA

2019 - Present

- Assist with growth of group, especially by promoting meetups to Trilogy students (see Professional Experience).
- Present JavaScript to organization members, furthering member growth and interest.
- Review code and help members on passion projects, programming knowledge, and interviewing skills, increasing likelihood of member retention.
- Attend presentations done by industry professionals.
